To: Potential CyberSober Customers

It is my pleasure and privilege to write this letter of referral and endorsement for CyberSober.com, Inc.

I first met some members of the CyberSober staff one year ago, when we invited them to the William W. Winpisinger Education and Technology Center. They gave a presentation and demonstration of their software system and service for use by our members. Their professionalism and warmth made the decision to purchase a software license easy. We are excited to be a part of something that is both a support service for our members and is equally affordable.

When they visited they made only one promise, "The degree of effort and support in making this program a success for the IAMAW, would not wane." They have exceeded our expectations. I have just returned from a trip to their headquarters where our team was met with a committee solely formed for our union. We developed solutions to help get the CyberSober Software out to our members.

Finally, I know CyberSober believes in helping their clients, they have always fulfilled our requests for training, systems and services without hidden costs. I would recommend anyone in need of cost-effective solutions whether they are union members, corporate employees, or individuals trying to find meetings or treatment centers contact CyberSober, you will not regret it!

Sincerely,

James D. Leslie, Ed.D.

Director

IAMAW William W. Winpisinger Education  
and Technology Center
